What Is Being Done?

Michigan Department of Transportation is reconstructing the I-94/Sargent Road interchange (Exit 145) near Jackson. The Sargent Road bridge over I-94 will be replaced and new eastbound I-94 ramps will be constructed as well.

Work also includes reconstructing Ann Arbor Road at Ponderosa Drive with the old I-94 ramps removed, realigning Ann Arbor Road between Sargent Road and Gilletts Lake Drive in order to access the new Sargent Road bridge, and building a nonmotorized pathway along Ann Arbor Road from Ponderosa Drive to Sargent Road. In addition, new sidewalks will be added on the Sargent Road bridge.

When Will This Be Done?

Construction is expected to begin in early April, with work along Sargent Road on the south side of I-94 and on the new eastbound I-94 ramps.

Near the end of June, the new Sargent Road bridge is expected to open and the current bridge will be removed. Work is expected to begin in late June on Sargent Road on the north side of I-94 and on the westbound ramps.

The I-94 Business Loop (BL) bridge (Exit 144), located just west of Sargent Road, is scheduled to be removed in the fall.

The entire project is scheduled to be complete by the end of November.

How Will Traffic Be Affected?

Two lanes of I-94 will be open in each direction at Sargent Road during daytime hours. There may be intermittent single-lane closures along I-94 on nights and weekends. At least one lane will be open under flag control on Sargent Road, Trailer Park Drive and Ann Arbor Road.

During Sargent Road bridge demolition and beam setting, I-94 will be closed from 10 p.m. to 6 a.m. the following morning for several nights. The posted detour will include Sargent Road, Ann Arbor Road and US-127. Advance notice will be provided before this closure.

I-94 will be reduced to one lane in each direction for two weeks while the I-94 BL bridge is removed in the fall. Advance notice will be provided before the bridge is removed.

Long-term Benefits

This project will improve mobility in this area and increase motorist and pedestrian safety.

MDOT's 2012 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
